How to Access the UCEM

Tools Needed: 3mm hex key, 2.5mm hex key for UCEM

Warning! High Voltage area be sure to turn off and unplug the machine before servicing.

UCEM - User Interface

1. Top Cover, simply undo the single screw near the front of the tower using a 3mm hex and then slide the cover forward and up.

2. Front Cover, undo all 8 button screws and slide to the right or left, whatever has more clearance away from steam or hot water wands.

***Note: be aware not to drag the cover on the interface because it may scratch the finish on your machine**

UCEM - Boiler Box

1. To remove the cover of the boiler box, you must unscrew, using 3mm hex, all 5 of the button screws, 2 on top and 3 on the front of the unit.

2. Then slide and lift the cover and set it aside.
3. Next to lower or drop down the front electrical panel to access the rest of the machine, use your 2.5mm hex on the single screw on the left-hand side of the panel. Set the screw aside for future ***Note: Be sure to hold or keep a hand on the front of the panel so it does not drop and damage the electronics on the interior of the panel.**
